ATTEMPTED SUICIDE.

With Suicidal Intent.

Perry Baize Attempts to Shuffle Off This Mortal Coil Near McHenry.

A short time ago Perry Baize, who lives near McHenry, attempted to commit suicide by taking morphine. After he had taken a very large quanself in the muscles of the back. It was removed by Dr. Smith and the patient is on the road to recovery.

It is runnored that Baize made a confession when he thought he was dying, which cleared up a dark page in the history of his community.

A love affair is said to be the cause of his desire to quit the realities of this world for the delightful uncertaintles of another.

There were twenty-two applicants at the Fordsville examination and seven at Beaver Dam, but the grading of their papers is not yet complete.

At the Comwell examination, Clarence Jones, A. V. Leach, Earl Smith and J. F. Miller received sufficient grades and were passed.

It is the purpose of the Superintendenl to hold commencement exercises for this class of graduates at the institute. This is more than a three-fold galn over the member who passed examination last year, and it tells plainly of the healthy public school sentiment in the county.

In Memory

Of little Estill Yewell Park, who departed this life May the 4th, age six months seven days. There was sorrow in the faces of papa and mamma as they bent over the little bed for they knew that darling Estill Yewel was drifting away from them and as they tried in vain to keep him, or to alleviate his last brief sickness, they, too, experienced in the bitter hour of parting the pangs of death, they only hoped he did not suffer now. The a) roses turned to lilacs on his cheeks; the lovely eyes saw them not, the breath on the pale lips came and went, fluttered, and seemed loath to leave its sweet prison. Those who loved him better than life could not lift a hand to avert the destroyer they could only watch and wait until the end came. No more smiles and kisses for little

Sugar From Watermelons.

Sugar is being made from watermelons in York county, Virginia, says an exchange. The operations are simple involving little skill and only a fair amount of horse sense. As a rule the ripest and best melons are selected for the purpose. The prime necessities are a large caldron and a slow but steady fire. Before lighting the furnace the kettles is filled with fruit, care being taken to save all the juice, so as not to require the addition of water to star the boil. its greatest exemplar, in the Republican party at least, in Theodore Roosevelt. Who can deny it on the record of things actually done? Where is there a longer due of achievement for any American of the age of torty five years? Every homof his mature life has bristled with combat and incident, His path has been rugged, but has been preserving His has been a light for new ideas and new metihods.

In spite of bitter criticism of him as of the "New Kentucky Home." a public administrator and a saldier, the true history of the war with Spain cannot be written without making Col Theodore Rossevelt one or the most conspicuous and dushing Americans engaged in the brief bal m.morable encounter-a short and sharp clash of arms which has led to an almost second revolution mour system . When he retnined from the war and was proposed for Governor of New York, the wise men said it would never do. It was proposed to saint him aside is an erratic and impractlcal person, who tact been allowed to run us far as it was rafe to let him ga But he was nominated, in the face of the protest of the men who had rioden the New York people with the power of the machine so long that they were proudly confi tlent that they could not be disturbed. Then came the shiver of remonstrance that such a mon could not be elected; but again he overrode precedent and landed gallantly in the executive establishment at Albany. And he was the real Governor of the State-so real that the men who wanted to can the Governor themselves, in practice though not in name could only keep hlm from getting a second term by inducing the national convention to nominate him for vice President of the United States on the tick-t with William McKiniey

There was the crucial inruing point in the career of a man of destiny. Af ter serving three years as President he stands as the undisputed leader of his party. There has not been an important line of policy on which Congress has had the hardthood to cross him. There has not been an executive act however extreme or unprecendented, against which the leg islative branch of the government has raised its protest. Men whose work has been law for Presidents as well as conventions are deterential to the man they used to smile at as an adventmen and a hazard in public life Five Presidents have died in effice Five "accidental" Presidents have been ambitions to be elected. Mr Roosevelt is the only one to command under such circumstances, the nomination of his party. For six monthor longer he has been some of it his acclamation. This is more than chapter in a man's life. It is a volume of the history of the country I breaks the record of the republic setsa pace at which the sages and servants of politics had become convinced no man would ever travel.
